

SAVE CART FOR MAGENTO 2

ICT

SAVE CART: INSTALLATION GUIDE

1. Login into the backend, go to System — Cache Management and enable all types of cache.

2. Connect to your website source folder with FTP/SFTP/SSH and upload all the extension files and folders to the root folder of your Magento installation:

Please use the “Merge” upload mode. Do not replace the whole folders, but merge them. This way your FTP/SFTP client will only add new files. This mode is used by default by most of FTP/SFTP client’s software. For MacOS it’s recommended to use Transmit. If you install several extensions from ICT, they will contain same files from the Base package — feel free to overwrite them, these are system files used by all our extensions.

3. Run following command:

```
php bin/magento setup:upgrade
```

4. Go to System — Cache Management page under Magento backend and click “Flush Cache Storage” button. After this action, the extension is installed.

SAVE CART CONFIGURATION

The screenshot shows the 'Configuration' page for the 'Save Cart' extension. The left sidebar contains navigation icons for Dashboard, Sales, Products, Customers, Marketing, Content, Reports, Stores, and System. The main content area is titled 'Configuration' and shows the 'Store View' set to 'Default Config'. A 'Save Config' button is visible in the top right. The configuration is organized into a sidebar menu with categories: GENERAL, CATALOG, CUSTOMERS, SALES, ICT (selected), SERVICES, and ADVANCED. Under the 'ICT' category, the 'Save Cart' sub-section is active. The 'General' configuration options are displayed, including: 'Enable' (Yes), 'Merge Cart products' (Yes), and 'Preserve Cart products' (Yes). Each option has a dropdown menu and a descriptive text below it.

Configuration Option	Value	Description
Enable [store view]	Yes	Extension enable/disable configuration.
Merge Cart products [store view]	Yes	Merge same products from popup while login process.
Preserve Cart products [store view]	Yes	Preserve member cart products while order process with guest cart products.

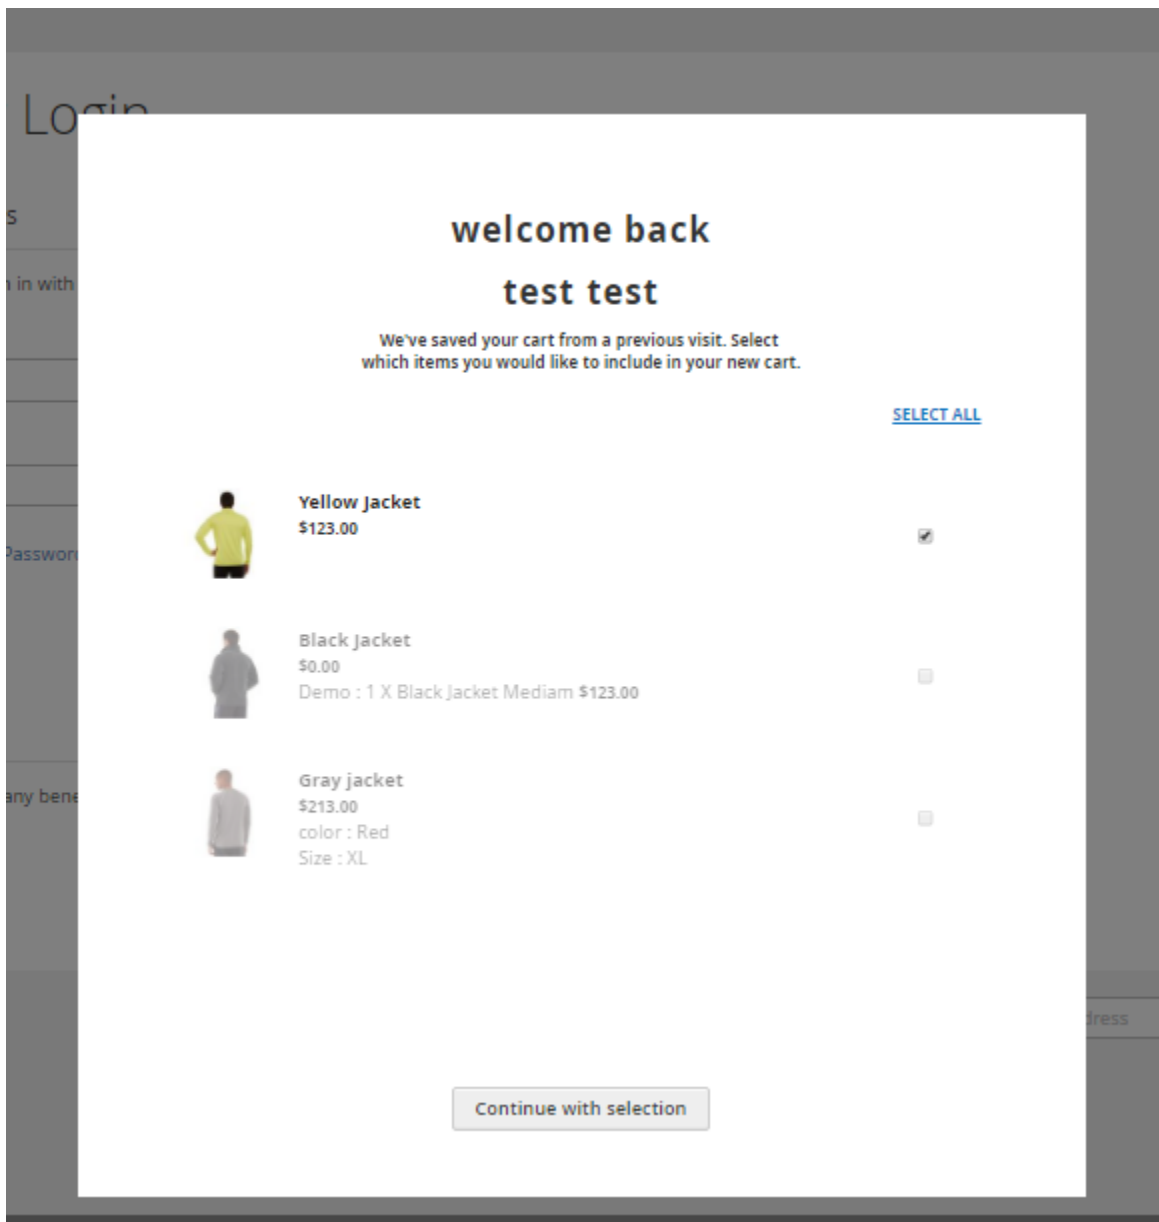

After successfully installation admin can see the configuration for save cart extension.

Admin can able set the enable/disable extension.

Admin can able set preserve cart products while place order.

Admin can able set Merge same product while login process.

MEMBER AND GUEST CART PRODUCT IN LIGHTBOX

The screenshot shows a lightbox overlay on a website. At the top, it says "welcome back" and "test test". Below that, a message reads: "We've saved your cart from a previous visit. Select which items you would like to include in your new cart." To the right of this message is a link that says "SELECT ALL".

Product Image	Product Name	Price	Additional Info	Select
	Yellow Jacket	\$123.00		<input checked="" type="checkbox"/>
	Black Jacket	\$0.00	Demo : 1 X Black Jacket Medium \$123.00	<input type="checkbox"/>
	Gray jacket	\$213.00	color : Red Size : XL	<input type="checkbox"/>

At the bottom of the lightbox is a button labeled "Continue with selection".

First customer need to add product in your member cart than do the logout process. After logout customer add the product in guest cart and going for login process. Fill up the login detail and customer can get the light box.

Light box will display only for both cart which have some products in cart.

User can see the product different with the color shadow and also able to click on select all/deselect all product.

If user click deselect all product the product will automatically remove from cart after the process.

User can choose which product want to add in current cart and which product want to remove from the cart.

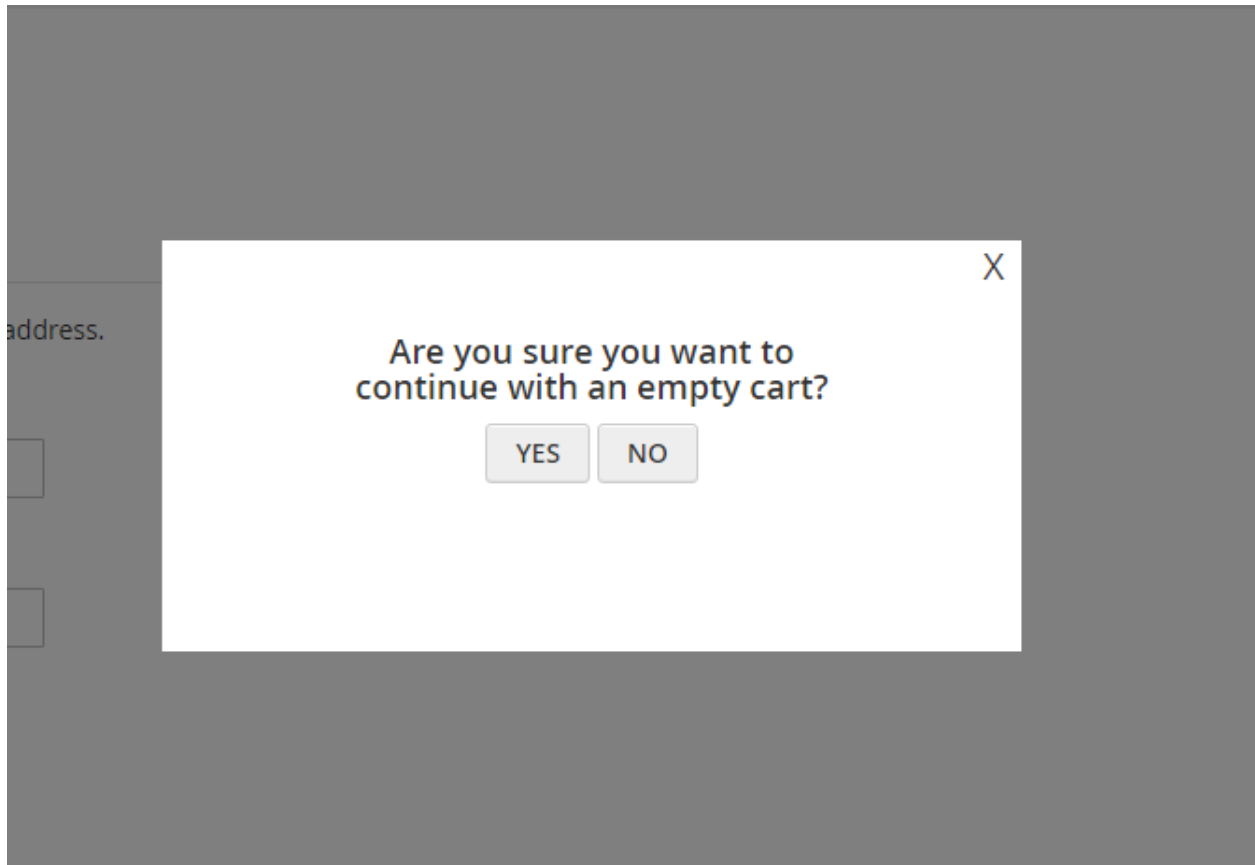

User can see the welcome message top of the light box.

After selection user can click the continue with selection button and redirect to cart page.

User can see only those product which selected from light box.

REMOVE WHOLE CART CONFIRMATION

First customer need to add product in your member cart than do the logout process. After logout customer add the product in guest cart and going for login process. Fill up the login detail and customer can get the light box.

When user can choose deselect all product than by clicking continue with selection button user can see confirmation box.

If user want to select "Yes" than all product will remove from cart.

If user want to select "No" than user get the existing light box which have member and guest cart products List of brands are display on layered navigation on brand page. By clicking any brand name will display with view brands page.

Admin can set the configuration for layered navigation block, search box and alpha bate search box.
