

DISPLAY PRICE TO LOGGED IN USER FOR MAGENTO 2

ICT

CUSTOMER PRICE : INSTALLATION GUIDE

1. Login into the backend, go to System — Cache Management and enable all types of cache.
2. Connect to your website source folder with FTP/SFTP/SSH and upload all the extension files and folders to the root folder of your Magento installation:

Please use the “Merge” upload mode. Do not replace the whole folders, but merge them. This way your FTP/SFTP client will only add new files. This mode is used by default by most of FTP/SFTP client’s software. For MacOS it’s recommended to use Transmit. If you install several extensions from ICT, they will contain same files from the Base package — feel free to overwrite them, these are system files used by all our extensions.

3. Run following command:

```
php bin/magento setup:upgrade
```

4. Go to System — Cache Management page under Magento backend and click “Flush Cache Storage” button. After this action, the extension is installed.

Display Price to Logged in User once installed and configured from backend, you will see that pricing will disappear from Front-end products and user will see that "Login to See the Prices and Add Product to Car

PRODUCT DETAIL PAGE

Once you go on the Product Detail Page, you will observe that if you have enabled the “Contact Quote Button” to Yes, a button will appear on Detail Page, so if the user doesn’t wish to log in and directly get the quote.

CONTACT FOR QUOTE

if the user clicks on Contact for Quote, a popup will appear asking for some details.

If the user fills and submits the form, an Email will be sent to Admin.

ADD OR EDIT EMAIL TEMPLATE

The screenshot shows the Magento Admin interface for adding or editing an email template. The top navigation bar includes buttons for 'Back', 'Reset', 'Convert to Plain Text', 'Preview Template', and 'Save Template'. The main content area is titled 'Load default template' and features a 'Template' dropdown menu. The dropdown menu is open, displaying a list of templates. The 'Ict_Customerprice' template is highlighted with a red box. Below the dropdown menu, the 'Template Information' section is visible, with fields for 'Template Name', 'Template Subject', and 'Template Content'. The 'Template Name' field is currently empty, and the 'Template Subject' field contains the text 'New Account (Magento/luma)'. The 'Template Content' field is also empty.

We also have the email template configured, so just select the template which is under Ict_Customerprice and you can edit the template as per your choice.

MANAGE CONTACT QUOTE

Manage Contactquote

Once the Contact for Quote Form is Filled, its respective entry can be seen in the admin panel which can be managed and you can contact the users via Email or Phone.

Conclusion

DISPLAY PRICE TO LOGGED IN USER Extension forces customer to log in to see the product price. The customer cannot see the product price and add to cart button if not logged in. A Contact for Quote form will be available on product detail page. The customer can request a quote from here without login and admin will get an email of submitted form details.
